

In supplying the CTC with shipments of dead cane toads (adults, tadpoles and/or eggs), either whole or as dissected tissues (i.e. excised parotoid glands), we confirm the following.

1. We are a current CTC Affiliate.
2. We have agreed to the CTC Code of Conduct.
3. All dead toad material originates from cane toad eradication activities.
4. All toads were humanely euthanized (i.e. cool-freeze method).
5. Each shipment will be accompanied by a completed, signed copy of this Cane Toad Shipping Form.
6. Each shipment will be packaged in a manner compliant with relevant postal regulations. For example, we suggest dead toads be frozen solid, triple bagged in waterproof plastic bags, packed with shipping freezer packs and sealed in a robust, watertight insulated shipping container (e.g. a hard plastic Eski). The shipping container should be securely sealed (water-tight), this shipping form attached to the outside, and sent by overnight courier to the address shown below.
